

Please don't limit the programs or information on XM Radio. I am an over the road trucker and I benefit from the information on the XM Radio. So please don't limit the information we get. I pay for this so I should be able to get what I want.

This is the only Radio system that offers information to everyone. It helps over the road drivers that don't have any other ways to get the information. If you take that away then we will not have any way to get the weather, traffic, news and other information.

Please reject the NAB's petition 04-160.

Thank You
